## SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development using React.js, Node.js, Django, FastAPI, and MongoDB. Built multiple projects involving REST APIs, database design, authentication, and machine learning. Strong foundation in Data Structures, Object-Oriented Programming, DBMS, Java, Python, and SQL with a passion for software engineering and problem-solving.

## EDUCATION

|                                                                                                   |                                         |
|---------------------------------------------------------------------------------------------------|-----------------------------------------|
| Bachelor of Computer Science and Engineering<br><i>LJ Institute Of Engineering and Technology</i> | Ahmedabad, India<br>Aug 2024 – Present  |
| Higher Secondary Education (Science)<br><i>New Meghdoot VidhyaVihar</i>                           | Ahmedabad, India<br>Mar 2022 – Mar 2024 |

## PROJECTS

### **ForenSight** *React, FastAPI, Neo4j, MongoDB, FAISS, MinIO* | GitHub

- Developed a full-stack digital forensics platform featuring interactive case graphs and an AI copilot.
- Engineered backend pipelines to parse raw forensic logs into Neo4j graph relationships for threat mapping.
- Integrated local FAISS search with Groq LLM API to stream contextual, evidence-grounded reports.

### **LedgerX** *Django, Python, PostgreSQL, REST APIs, Cloudinary, JavaScript* | GitHub | Live

- Developed a POS and credit management app to digitize traditional paper ledgers for shopkeepers.
- Built an interactive analytics dashboard with soft-delete archiving and dynamic search capabilities.
- Integrated secure UPI deep-linking for automated payments and Cloudinary for scalable image hosting.

### **Vestra** *React, Node.js, Express.js, REST APIs, MongoDB* | GitHub | Live

- Developed a full-stack family wealth management dashboard to centralize Stocks, SIPs, and FDs.
- Engineered real-time data synchronization for live stock prices and SIP portfolio valuations.
- Implemented a Node.js cron-based notification engine for automated email alerts on financial events.

### **Cyber Threat Analyzer** *React, Python, FastAPI, Machine Learning, Scikit-Learn* | GitHub | Live

- Developed a full-stack threat detection web application using React and an asynchronous FastAPI backend.
- Integrated ML classifiers and text vectorization to detect malicious content.
- Designed a responsive UI featuring interactive data visualizations and immersive 3D background components.

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, SQL

**Frameworks:** Django, REST APIs, React.js, Node.js, Express.js, BeautifulSoup, Flask, FastAPI

**Data Science:** Pandas, Numpy, Matplotlib, Seaborn, Plotly

**Database:** PostgreSQL, MySQL, MongoDB, Redis, Neo4j

**Core:** OOPs, DBMS, Software Engineering

## CERTIFICATIONS

- Exploratory Data Analysis for Machine Learning – **IBM** | Cert
- Introduction to HTML, CSS & JavaScript – **IBM** | Cert
- Inheritance and Data Structures in Java – **University of Pennsylvania** | Cert
